BALD EAGLES

Repatriation of an Iconic Bird to the Central Coast

Sunday, November 17, 2013
1 PM

Glenn R. Stewart

UC Santa Cruz Predatory Bird Research Group

Forty years ago the bald eagle was in danger of extinction. In 1973, it was placed under protection of the Endangered Species Act. Shortly thereafter, Glenn Stewart teamed up with the Ventana Wildlife Society to create a bald eagle recovery plan for central California. Stewart and a team of biologists brought dozens of eagle chicks from Canada to Big Sur in an effort to reintroduce the iconic bird back to the Central Coast. Stewart told the San Mateo Daily Journal, "The goal for the reintroduction of bald eagles to the Central Coast was three pairs. We were looking at a pretty bleak scene out there. Now there are 26 pairs in the Bay Area alone."

Free with admission to the Seymour Center
(\$6 Adults / \$4 Students or Seniors)

FREE ADMISSION
for Seymour Center Members and UC Santa Cruz
Undergraduates with valid Student ID.

Join Stewart in celebration of the 40th anniversary of the Endangered Species Act, and hear the remarkable story of the return of the bald eagle.

At the end of Delaware Avenue, Santa Cruz
(near Natural Bridges State Beach)
