Seymour Center at Long Marine Lab

OUR OCEAN'S EDGE

At the Intersection of Art and Conservation

Sunday, May 20, 2018
1:30 PM

Dwight Holing
Author

Jasmine Swope
Photographer

California made history with the creation of the nation's first statewide system of ocean parks—a network of 124 Marine Protected Areas spanning California's 1,100-mile long coastline. Like national parks on land, these areas are magnificent in beauty and provide protection for wildlife, solutions to climate change, and recreational resources.

Soon after the system was established, photographer Jasmine Swope set out to capture the essence of these marine parks. The result is Our Ocean's Edge, a photographic documentary project coupled with narratives by author Dwight Holing, that both celebrates these fragile seascapes and inspires conservation action. This spring, the exhibit derived from this project has graced the Seymour Center's exhibit hall. Join Swope and Holing as they share this remarkable portrait of California's stunning marine reserves, and see the exhibit before it closes on June 3.

Free with admission to the Seymour Center
(\$8 Adults / \$6 Students or Seniors)

FREE ADMISSION

for Seymour Center Members and UC Santa Cruz
Undergraduates with valid Student ID
