APPLY to become a
SCHOOL PROGRAMS VOLUNTEER
at the Seymour Marine Discovery Center at Long Marine Lab!

Make a DIFFERENCE for the ocean and HAVE FUN doing it!

We are seeking enthusiastic individuals (ages 18 and above) who enjoy working with children, and have an interest in learning and teaching about the ocean. *Bilingual speakers are encouraged to apply.*

School groups visit the Seymour Center to marvel at marine science and research through hands-on activities and tours at Long Marine Lab. Teams of school volunteers and staff instructors lead structured learning activities and interactive tours. Volunteer training covers marine science topics, marine mammal research, and practice teaching and leading tours at the lab. We provide the tools you need to inspire conservation of our ocean!

School Programs Volunteers can apply for INTERNSHIPS. Student interns can enroll for environmental studies internship credit.

**School Programs Volunteer training** takes place each fall (September-October). Applications are accepted year-round and reviewed. Selected candidates are contacted for interviews in August for fall training, or as positions become available.
